

MESSAGE FROM JEY, 10-24-04

The recorder did not come on at the beginning of JEY'S communication. And so we pick up the transcript at a late point in the communication. Sorry.

.....has taken place down through the years. In other words, your own country could have been attacked. And so at this time we would ask you to simply give thought to what you often talk about which is the "two towers" event. This is not to say that you are immune from such events happening upon the Earth, but you certainly did not expect such to happen.

You can say that indeed this, which is your country, was awakened by that which happened to you at that time; but you have tended to slide back into your old ways of doing things and to forgetting that you need to call upon the Creator of Us All in order to repair those things, the attitudes, the actions of those people upon the Earth. And so this one who is JEY comes to simply talk with you about what is necessary at this time.

There is a knowledge upon the Earth that much needs to be changed with regard to your Spiritual outlook upon the Earth. You have discussed some of those things during this time of meeting. You have talked about those attitudes that require changing at this time. So what JEY wishes to say to you at this time is this. When one is in a time of not knowing exactly what to do upon the Earth, you often take that which is the opinion of others as that which is the rule for you to follow. In other words, if your house is 'burning down', you would simply ask of others what you should do with regard to that. Well, of course, you would contact your own agency upon the Earth that does take care of house fires, but you do not think about what caused the fire to begin with. And so in your own country at this time we might say "the house is burning." What you need to do is contact that agency that does answer the need you have at this time. We have used "the house is burning" as simply a picture of what is happening in your country at this time. And so we can say "the house is burning."

When we contact that agency that is to put out the fire that is roaring throughout the area where your home is located, we expect that work to be done. Yet, in your own country you are allowing first the house to burn; second, you are doing nothing to put out the fire. At this time the "fire" is causing so much hatred and violence upon the Earth. We need to pay more attention to that hatred and violence and understand what is causing such upon the Earth. We know that there are many people living in this country that have different attitudes and feelings and understandings, so you have to be able to deal with all those things in order to please all who are living here in one country.

But know this. There are many people who have come here without the right to live in this country and bringing with them the desires and needs of their people. In other words, those who come into this country illegally bring with them the need to work, the need to make a living. And yet they have the desire and need to fulfill their wants within this country. You know that it is not possible to fill the needs of all those people who enter this country along with the needs of all those people who have a right to live here in this country. And so each of you simply sit back and think upon those things that intrude upon your lives, and know you can do nothing about what is happening.

And so, as JEY said, if the "house is burning down" and you cannot do anything to stop the fire, then of course there must be action taken by those agencies within the country which can deal with this which is taking place.

JEY is not a politician! JEY does not wish to be a politician. JEY comes as one who is in the will of the Creator and comes to serve a Spiritual purpose upon the Earth. And so with that in mind, JEY would urge you to be in a time of prayer, a time of meditation, that each of you will have an important time upon the lives of those people in your country who are in need of help; and you know from past experience that there are many who are in need of help.

You need only to be in prayer, you need only to be in a time of meditation in order for your influence to be felt throughout the country. JEY would tell you that with this way of entering into the dialogue that must be undertaken with people in your country, within your area, know that prayer and meditation can substitute for the type of action that you wish to have taken with regard to those people. JEY would tell you that there are many within your own area who are in need of such prayer and meditation, and JEY would ask you to be in a time of prayer daily in order that your thoughts may go out to everyone who is in need of prayer during this time of life.

JEY is not one to come to communicate with you for no reason at all; but JEY would tell you that there is a more urgent need for prayer and meditation at this time upon the Earth. Know that that which is

referred to as the 'twin towers' is simply the beginning of violence within this country. It will increase unless that person who is chosen to be the leader of your country is one who will continue to watch out after the welfare of the people of this country. And so it is with love that JEY comes not to frighten you but simply to warn you of what can happen within your own country. Know that love indeed will solve many things or questions, and so you must not fall heir to disbelief and hatred but rather to love and belief in what can be done.

Be at peace now with what JEY has said to you. Know that there is not a 'quick fix' to all that inflicts itself upon country. But you will live to see that which is peace within your countryside if through prayer and meditation you can take action that is necessary for all. It is known that there is indeed a time of peace and love ahead. You must be patient. You must pray. You must meditate.

Go now in Peace believing that all that is needed can be given. Go in Love. AMEN.
